

A close-up, low-angle shot of a white ceiling-mounted air conditioning unit. The unit is sleek and modern, with a visible air outlet at the bottom. The background is a soft, light blue gradient.

# Gamma residenziale Bluevolution

Ridefinisce gli standard di mercato per efficienza, silenziosità, aria pura e controllo dei consumi, con particolare attenzione all'impatto ambientale.

# Siete pronti per l'evoluzione del comfort?

## Scoprite il benessere del futuro

Chi sceglie Daikin per la propria casa, sceglie semplicemente il meglio. Oggi, Daikin ha portato il concetto di comfort a un livello assolutamente nuovo, reinventando l'ambiente grazie alla sua gamma **Bluevolution**. Scegliendo le tecnologie Daikin, potete avere il massimo dell'efficienza, della silenziosità e dell'aria pura.

Gli elevati livelli di efficienza stagionale garantiscono l'atmosfera migliore sia d'estate sia d'inverno, minimizzando i consumi. Il nuovo refrigerante R-32 è più eco-compatibile rispetto ai refrigeranti standard.

La vasta esperienza di Daikin e l'ampia gamma di prodotti offerti sono sinonimo di affidabilità e di sistemi duraturi nel tempo, perfetti per la vostra casa. E anche quando non siete in casa, potete controllare e regolare la temperatura nelle stanze e la modalità operativa tramite un'app per smartphone semplicissima da usare. Lasciatevi guidare da Daikin per creare l'atmosfera perfetta.

## Il vostro climatizzatore ha più di 10/15 anni? Scoprite i vantaggi di sostituirlo con un nuovo Daikin Bluevolution.

Ecco i principali benefici:

- › **consumi dimezzati**, risparmiando sui costi di energia. In tal modo fate bene all'ambiente e al vostro portafoglio,
- › **silenzio assoluto** con un prodotto di 10 decibel meno rumoroso, praticamente impercettibile: per dormire, ascoltare musica e studiare senza alcun disturbo,
- › **4 anni di garanzia** su tutta la gamma Bluevolution.
- › **aria pura**, grazie al sistema brevettato Flash Streamer™, per rimuovere polveri, pollini, muffe e tanti altri allergeni; persino odori cattivi, virus e batteri,
- › **detrazioni fiscali** del 50 e 65% (verificate su daikin.it),
- › **nuovo design**, con prodotti progettati affinché il climatizzatore risulti un elemento d'arredo.

# Fate un bel respiro

# Aria pura

## Un'ampia scelta

Le soluzioni Daikin sono eleganti, silenziose ed efficienti. Per una o più stanze, Daikin ha l'unità giusta per voi.

### Perché scegliere Daikin?

La serie Daikin Bluevolution offre il meglio per quanto riguarda comfort e aria pura, design e prestazioni. Sia che desideriate riscaldare o raffreddare una o più stanze, preferiate unità a parete o canalizzabili da controsoffitto, Daikin ha la soluzione su misura per voi.

### Comfort unico: Ururu Sarara

Controllo completo dell'aria con deumidificazione, umidificazione, purificazione e rinnovo dell'aria, garantendo massimi livelli di efficienza in riscaldamento e raffreddamento.

### Comfort e design: Daikin Emura

Massimi livelli di comfort ed efficienza abbinati a uno stile esclusivo.

### Comfort innovativo: FTXM-M

Unità eleganti per l'installazione a parete, che garantiscono la massima qualità dell'aria interna e prestazioni uniche.

### Comfort discreto: FTXP-K3

Unità discrete per l'installazione a parete che garantiscono alta efficienza e comfort.

### Comfort invisibile: unità canalizzabile da controsoffitto FDXM-F

Sono visibili solo le griglie di aspirazione e mandata.

## Applicazioni Multi e Monosplit

Selezionate l'unità esterna che meglio risponde alle vostre esigenze. Nelle applicazioni monosplit è possibile collegare una unità esterna a un'unica unità interna. Le unità multi "salvaspazio" possono invece essere collegate a un massimo di cinque unità interne in stanze diverse.

### Unità esterne per applicazioni monosplit

- › RXZ-N (in combinazione con Ururu Sarara)
- › RXJ-M (in combinazione con Daikin Emura)
- › RXM-M (in combinazione con FTXM-M)
- › RXP-K3 (in combinazione con FTXP-K3)

### Unità esterne per applicazioni multisplit

- › Le unità esterne 2MXM-M, 3MXM-M, 4MXM-M e 5MXM-M sono combinabili con le unità interne FTJ-M, FTXM-M e FDXM-F.

## Efficienza energetica

Creare un clima piacevole nella propria casa non è solo una questione di comfort. I sistemi Daikin sono anche rispettosi dell'ambiente...e del portafoglio.

### Efficienza stagionale in riscaldamento e raffrescamento

Le avanzate tecnologie Daikin per il risparmio energetico garantiscono elevati livelli di efficienza stagionale sia in riscaldamento sia in raffrescamento, fino alla **classe A+++**. Considerate che un prodotto in classe A+++ è fino al 40% più efficiente di un prodotto in classe A++.

L'efficienza stagionale è un nuovo modo di classificare i prodotti per il riscaldamento e il raffrescamento sulla base della loro efficienza energetica nell'arco dell'anno.

## R-32: più efficiente ed eco-compatibile

Daikin utilizza l'R-32, un refrigerante che comporta minori emissioni di CO<sub>2</sub>. Ciò significa che le unità hanno un potenziale di riscaldamento globale più basso e, in generale, sono più efficienti. A tutto vantaggio dell'ambiente!

## Il massimo del comfort: silenziosità e aria pura

### Estrema silenziosità

Le unità rumorose fanno ormai parte del passato. I sistemi Daikin sono così silenziosi da risultare impercettibili. Potete leggere, studiare e dormire senza alcun rumore di fondo.

### Migliore qualità dell'aria con la tecnologia Daikin Flash Streamer™

Le unità Daikin Ururu Sarara e FTXM-M grazie alla tecnologia Flash Streamer™ emettono un fascio di elettroni ad alta velocità per provocare reazioni chimiche con le molecole dell'aria, eliminando impurità quali pollini, muffe, virus, NO<sub>x</sub> e odori, lasciando l'aria completamente pulita e priva di allergeni.

- › Ururu Sarara
- › FTXM-M

Elettroni ad alta velocità generati dalla tecnologia Flash Streamer™

# Tutto sotto controllo per un clima perfetto

## Distribuzione dell'aria intelligente

I climatizzatori creano una piacevole atmosfera nei locali distribuendo aria pulita all'interno delle stanze. Come sempre Daikin ha dato il meglio di sé e grazie all'avanzata tecnologia utilizzata non sentirete nessun movimento d'aria sulla vostra pelle.

### Sensore "Intelligent Eye" con controllo di presenza e di posizione

Se la stanza rimane vuota, il sistema passa in modalità risparmio energetico. In presenza di persone, torna alle impostazioni originali. L'aria viene soffiata lontano dalle persone: mai più correnti d'aria fredda/calda dirette.

### Flusso dell'aria tridimensionale

La temperatura della stanza rimane costante grazie alla combinazione di oscillazioni automatiche verticali e orizzontali delle alette. L'aria viene distribuita in modo uniforme in tutta la stanza, fino a raggiungere ogni angolo, anche nei locali più grandi.

## Controllo tramite app

Non siete a casa? Grazie a **Online Controller** di Daikin il problema è risolto. Potete regolare la temperatura interna, la portata d'aria e la modalità di funzionamento dal vostro device\*, quando e dove volete. In più, potrete tenere sotto controllo i consumi energetici, gestendo il vostro clima in modo responsabile.

COMPATIBILE

\* Online Controller è disponibile per smartphone e tablet su Apple Store e Google Play.

# Ururu Sarara

## Comfort unico

### Ururu = Umidificazione

La temperatura percepita può essere diversa da quella rilevata.

L'aria che ci circonda contiene normalmente un certo grado di umidità relativa. In inverno, una stanza con aria troppo secca non solo sembrerà più fredda (cosa che potrebbe indurvi ad accendere il riscaldamento senza un'effettiva necessità), ma provocherà mal di gola e secchezza della pelle. Potrebbe persino danneggiare mobili, pavimenti in legno, libri e oggetti d'arte.

Il sistema di umidificazione intelligente Ururu Sarara può assorbire la giusta quantità di umidità latente dall'esterno portandola all'interno.

### Sarara = Deumidificazione

Esistono diversi modi per raffrescare un locale in estate.

In estate, l'umidità dell'ambiente aumenta e, proprio come l'aria secca fa percepire un freddo maggiore, l'aria umida rende l'ambiente più afoso, diffondendo nei locali una sensazione di caldo opprimente. Con i sistemi convenzionali, la soluzione è abbassare la temperatura, sprecando energia ed elettricità.

Il deumidificatore intelligente Ururu Sarara, invece, offre una soluzione migliore. Rimuove automaticamente l'umidità in eccesso dalla stanza mantenendo sempre la temperatura uniforme, regalandovi così tutto il comfort necessario, in modo più semplice.

Il termografo mostra la temperatura della pelle 30 min. dopo essere entrati nella stanza, in condizioni di umidità relativa differente.

Temperatura: 25°C  
Umidità: **80%**  
L'aria umida conferisce una sensazione di **calore**.

Temperatura: 25°C  
Umidità: **50%**  
In un ambiente deumidificato si percepisce una maggiore **sensazione di freschezza**.

## Ventilazione e purificazione dell'aria

### Aria fresca, anche con le finestre chiuse

A differenza dei climatizzatori tradizionali, il sistema Ururu Sarara porta aria esterna climatizzata nel locale, alla temperatura desiderata e senza perdite di calore. Il filtro autopulente dell'unità raccoglie lo sporco e le particelle presenti nell'aria esterna, garantendone la pulizia così come la massima efficienza di funzionamento del sistema. La tecnologia Flash Streamer™ di Daikin fa in modo che l'aria venga purificata continuamente e sia priva di polvere, muffe, allergeni, cattivi odori, virus e batteri.

## Lo stile di Daikin Emura

Sintesi perfetta di tecnologia e design, Daikin Emura è stato progettato in Europa per l'Europa e garantisce un eccezionale controllo del clima. La tecnologia intelligente su cui si basa renderà la vostra casa talmente confortevole che dimenticherete praticamente di averlo.

## Design d'eccellenza

Daikin Emura ha ricevuto il premio Red Dot 2014 per la progettazione di prodotto, il German Design Award - Special Mention 2015, il Focus Open 2014 Silver, il Good Design Award 2014 e il premio iF Design Award 2015.

### Perché scegliere Daikin Emura?

- › Design eccezionale con due eleganti finiture, argento e antracite o bianco puro opaco
- › Elevata efficienza stagionale, fino ad A+++
- › Controllo tramite smartphone o un semplice telecomando
- › Sensore "Intelligent Eye" con doppia area di controllo
- › In modalità silenziosa è praticamente impercettibile
- › Aria interna di qualità grazie al filtro deodorizzante all'apatite di titanio e al nuovo filtro "Silver Allergen" per la rimozione degli allergeni come i pollini, assicurando un apporto costante di aria pura.

# FTXM-M

## Comfort intelligente

### Efficienza energetica: fino alla classe A+++/A+++

Le unità FTXM-M di Daikin si basano su una tecnologia all'avanguardia e un'intelligenza integrata. Ciò garantisce un funzionamento continuo nel rispetto degli standard più elevati e il raggiungimento della classe di efficienza A+++ , sia in riscaldamento sia in raffrescamento.

### Progettazione europea per le case europee

I climatizzatori FTXM-M di Daikin sono eleganti e raffinati, e si abbinano perfettamente al gusto tipico europeo in materia di arredamento di interni. Questo sistema Split per installazione a parete risponde agli standard tecnici europei in modo estremamente funzionale.

### Estremamente silenzioso

È più facile essere se stessi in un ambiente tranquillo. Il sistema FTXM-M di Daikin è talmente silenzioso che vi dimenticherete praticamente di averlo.

## Una climatizzazione controllata per un'aria più fresca e pulita

Daikin rende confortevoli le vostre stanze pulendo e distribuendo l'aria al meglio. L'aria passa attraverso il filtro purificatore deodorizzante che elimina i cattivi odori. La tecnologia Flash Streamer™ di Daikin neutralizza muffe, batteri e virus prima di rilasciare aria pulita e sana nella stanza. Il flusso tridimensionale fa circolare l'aria sia in verticale sia in orizzontale per un comfort avvolgente. Il sensore "Intelligent Eye" a doppia area di controllo direziona l'aria lontano dalle persone presenti nella stanza e, quando non c'è più nessuno, attiva la modalità risparmio energetico.

## Tecnologia Flash Streamer™

Virus prima e dopo

Pollini prima e dopo

Funghi prima e dopo

I virus e gli allergeni sono stati posizionati sull'elettrodo dell'unità Streamer Discharge e successivamente fotografati con un microscopio elettronico dopo essere stati irradiati. (Test eseguiti da: Yamagata University e Wakayama Medical University)

# FTXP-K3

## Comfort discreto

### Stile discreto ed elegante

Il climatizzatore FTXP-K3 si distingue per un design classico, discreto ed elegante. Il pannello frontale bianco si integra armoniosamente in tutti gli ambienti.

### Modalità Econo

La modalità Econo permette di ridurre l'assorbimento elettrico permettendo un elevato risparmio energetico. Questa funzione, attivabile anche mentre l'unità è in funzione, è particolarmente utile quando si utilizzano contemporaneamente altri elettrodomestici.

### Filtro al titanio rivestito in apatite

Cattura le particelle di polvere sospese nell'aria, le sostanze chimiche organiche nocive e decompone gli odori, garantendo così un flusso costante di aria pulita.

### Modalità Comfort

Il deflettore modifica l'angolo di uscita dell'aria, orizzontalmente per il raffreddamento e verticalmente verso il basso per il riscaldamento, per impedire che l'aria venga soffiata direttamente sulle persone.

## Online Controller

Con Online Controller si accede al controllo remoto del climatizzatore tramite un'App scaricabile su smartphone e tablet.

Anche quando non sei in casa è possibile accendere, spegnere, impostare il funzionamento in raffrescamento o riscaldamento, regolare la temperatura ambiente e il flusso d'aria del climatizzatore. Un servizio moderno per un utente dinamico e consapevole, che vuole poter gestire in ogni momento un imprevisto cambio di programma senza rinunciare al comfort, ma anche attento ad un uso responsabile dell'energia, ai consumi e al costo della bolletta. Con il controllo remoto non è più necessario programmare il timer prima di uscire.

# Sistemi multisplit efficienza superiore

Applicazione monosplit:  
una unità esterna per stanza

Applicazione multisplit:  
soluzione perfetta per il riscaldamento o il raffreddamento di più stanze

## Primi per efficienza

Progettate con refrigeranti e compressori ad alta efficienza energetica che garantiscono prestazioni ottimali, tutte le unità multisplit consentono di tagliare i consumi fino all'80%. **Tutti i multi Bluevolution sono in classe A+++/A++.**

## Unità multi "salvaspazio"

È possibile collegare fino a cinque unità interne a una sola unità esterna multi. La soluzione ideale per rispondere alle esigenze di chi desidera riscaldare e raffreddare più stanze.

**2+2**  
ESTENSIONE  
DI GARANZIA  
GRATUITA  
CON KIZUNA

# FDXM-F

## Comfort invisibile

R-32

### Unità canalizzabile da controsoffitto compatta

- › Le dimensioni compatte permettono l'installazione in controsoffitti poco profondi (alti solo 200 mm)
- › Installazione discreta nel soffitto: risultano visibili solo le griglie
- › Bassi consumi energetici
- › Il programma di deumidificazione riduce l'umidità nell'aria senza provocare variazioni nella temperatura interna

|---------------|-----------|----------|---------|---------------------------------|
| A parete      |           |          |         | Canalizzabili da controsoffitto |
| FTXZ-N        | FTXJ-MW/S | C/FTXM-M | FTXP-K3 | FDXM-F                          |
|               |           |          |         |                                 |

|                     |                                 |  |  |   |   |   |   |   |
|---------------------|---------------------------------|--|--|---|---|---|---|---|
| Ambiente            |                                 | Modalità Econo   | Questa funzione riduce la potenza assorbita, rendendola così disponibile per altre applicazioni che richiedono potenze elevate. Consente inoltre di risparmiare energia.   | • | • | • | • |   |
|                     |                                 | Sensore di movimento a 2 aree di azione  | Questa funzione consente di direzionare il flusso d'aria verso una zona diversa da quella in cui si trova la persona in quel momento. Se non viene rilevata la presenza di persone, l'unità passa automaticamente alla modalità di efficienza energetica.  |   | • | • |   |   |
|                     |                                 | Sensore di movimento a 3 aree di azione  | Questa funzione consente di direzionare il flusso d'aria verso una zona diversa da quella in cui si trova la persona in quel momento. Il rilevamento avviene in 3 direzioni: destra, sinistra e lato frontale. Se non viene rilevata la presenza di persone, l'unità passa automaticamente alla modalità di efficienza energetica. | • |   |   |   |   |
|                     |                                 | Sensore di movimento   | Il sensore rileva la presenza di persone nel locale. Quando il locale è vuoto, dopo 20 minuti l'unità passa alla modalità risparmio energetico e si riavvia quando qualcuno entra nel locale.  |   |   | • |   |   |
|                     |                                 | Funzione di risparmio energetico in standby  | I consumi energetici si riducono di circa l'80% in modalità standby. Se non viene rilevata la presenza di persone per più di 20 minuti, il sistema passa automaticamente alla modalità risparmio energetico.   | • | • | • | • |   |
|                     |                                 | Modalità "Home Leave"  | Durante l'assenza delle persone nel locale, è possibile mantenere la temperatura interna a un determinato livello.   |   |   |   |   |   |
|                     |                                 | Modalità notturna  | Risparmia energia impedendo che la temperatura salga o scenda eccessivamente durante la notte.   |   | • | • | • |   |
|                     |                                 | Solo ventilazione  | Il climatizzatore può essere utilizzato anche nella sola modalità di ventilazione, senza raffreddamento o riscaldamento.   | • | • | • | • | • |
|                     |                                 | Filtro autopulente   | Il sistema effettua automaticamente la pulizia del filtro una volta al giorno. Semplicità di manutenzione e sinonimo di efficienza energetica e massimo comfort, senza costi elevati né perdite di tempo.  | • |   |   |   |   |
| Comfort             |                                 | Modalità Comfort   | Questa unità cambia automaticamente la direzione di mandata dell'aria del deflettore in base alla modalità. In modalità raffreddamento, l'aria viene direzionata verso l'alto per evitare la formazione di correnti fredde; in modalità riscaldamento, invece, viene diretta verso il basso per evitare i piedi freddi.            | • | • | • | • |   |
|                     |                                 | Modalità Powerful  | Se la temperatura del locale è troppo alta o troppo bassa, è possibile raffreddarla o riscaldarla rapidamente selezionando la "Modalità Powerful". Una volta disattivata a modalità "Powerful", l'unità torna alla modalità preimpostata.  | • | • | • | • |   |
|                     |                                 | Commutazione automatica raffreddamento-riscaldamento   | Seleziona automaticamente la modalità raffreddamento o riscaldamento per raggiungere la temperatura impostata.   | • | • | • | • |   |
|                     |                                 | Impossibile sentirle   | In modalità silenziosa, le unità interne Daikin sono praticamente impercettibili.  |   | • | • |   |   |
|                     |                                 | Ultrasensibile (fino a 19 dB(A))   | Le unità interne Daikin sono silenziosissime.  | • | • | • |   |   |
|                     |                                 | Calore radiante  | Il pannello frontale dell'unità interna diffonde calore supplementare per un maggiore comfort nei giorni più freddi.   |   |   |   |   |   |
|                     |                                 | Funzione Silent unità interna  | Per garantire la minima rumorosità durante lo studio o il sonno, l'utente può ridurre il rumore emesso dall'unità interna di 3 dB(A) tramite telecomando.  | • | • | • | • |   |
|                     |                                 | Modalità "sleep" confortevole  | Questa modalità innovativa aumenta il comfort gestendo le fluttuazioni di temperatura durante la notte.  | • |   |   |   |   |
|                     |                                 | Funzione Silent unità esterna  | Per non disturbare il vicinato, l'utente può ridurre il rumore emesso dall'unità esterna di 3 dB(A) tramite telecomando.   | • | • | • |   |   |
|                     |                                 | Flusso dell'aria tridimensionale   | Questa funzione utilizza il movimento oscillatorio sia verticale che orizzontale per assicurare la circolazione di aria calda/fredda anche negli angoli degli ambienti di grandi dimensioni.   | • | • | • |   |   |
|                     |                                 | Oscillazione verticale automatica  | Possibilità di selezionare il movimento verticale automatico del deflettore di mandata dell'aria, per rendere uniformi il flusso d'aria e la distribuzione della temperatura.  | • | • | • | • |   |
|                     |                                 | Oscillazione orizzontale automatica  | Possibilità di selezionare il movimento orizzontale automatico del deflettore di mandata dell'aria, per rendere uniformi il flusso d'aria e la distribuzione della temperatura.  | • | • | • |   |   |
|                     |                                 | Regolazione automatica della velocità del ventilatore  | Seleziona automaticamente la velocità del ventilatore per raggiungere o mantenere la temperatura impostata.  | • | • | • | • |   |
| Portata aria        |                                 | Gradini di velocità del ventilatore  | Permette di selezionare diverse opzioni di velocità del ventilatore.   | 5 | 5 | 5 | 5 | 3 |
|                     |                                 | Umidificazione Ururu   | L'umidità viene assorbita dall'aria esterna e distribuita in modo omogeneo all'interno.  | • |   |   |   |   |
|                     |                                 | Deumidificazione Sarara  | Riduce l'umidità interna senza modificare la temperatura ambiente, mescolando aria fredda e secca con aria calda.  | • |   |   |   |   |
| Controllo umidità   |                                 | Programma di deumidificazione  | Gestisce la riduzione di umidità nell'aria evitando un eccessivo riscaldamento.  |   | • | • | • | • |
|                     |                                 | Flash Streamer   | Flash Streamer genera un flusso di elettroni ad alta velocità in grado di degradare batteri, virus e allergeni, rendendo l'aria più pulita.  | • |   | • |   |   |
|                     |                                 | Filtro a base di argento ad azione purificante e rimozione degli allergeni   | Cattura gli allergeni quali il polline assicurando un'erogazione costante di aria pulita.  |   | • | • |   |   |
|                     |                                 | Filtro ad azione deodorizzante a base di titanio   | Cattura le particelle di polvere sospese nell'aria, le sostanze chimiche organiche nocive come batteri, virus e allergeni e decompone gli odori quali tabacco e animali.   | • | • |   | • |   |
| Trattamento aria    |                                 | Filtro ad azione deodorizzante   | Cattura le particelle di polvere sospese nell'aria e decompone gli odori assicurando un'erogazione costante di aria pulita.  |   |   |   |   |   |
|                     |                                 | Filtro   | Rimuove le particelle di polvere sospese nell'aria assicurando un'erogazione costante di aria pulita.  |   |   |   |   | • |
|                     |                                 | Regolatore online  | Controlla le unità interne da qualsiasi luogo tramite una app.   | • | • | • | • |   |
| Telecomando e timer |                                 | Timer settimanale  | Il timer può essere impostato per avviare il raffreddamento o il riscaldamento in qualsiasi momento, su base giornaliera o settimanale.  |   | • | • | • | • |
|                     |                                 | Timer 24 ore   | Il timer può essere impostato per avviare il raffreddamento/riscaldamento in qualsiasi momento, nell'arco delle 24 ore.  | • | • | • | • | • |
|                     |                                 | Telecomando a infrarossi   | Telecomando a raggi infrarossi con display LCD per avviare, arrestare e programmare l'unità a distanza.  | • | • | • | • | • |
|                     |                                 | Comando a filo   | Il comando a filo consente di avviare, arrestare e programmare l'unità a distanza.   |   | • | • | • | • |
| Altre funzioni      |                                 | Telecomando centralizzato  | Telecomando centralizzato per avviare, arrestare e programmare più climatizzatori da una postazione centralizzata.   | • | • | • | • | • |
|                     |                                 | Funzione di riavvio automatico   | Dopo un'interruzione di corrente, l'unità si riavvia automaticamente con le impostazioni originali.  | • | • | • | • | • |
|                     |                                 | Autodiagnostica  | Semplifica la manutenzione indicando malfunzionamenti del sistema o anomalie di funzionamento.   | • | • | • | • | • |
|                     |                                 | Applicazione Multi   | Possibilità di collegare fino a 5 unità interne ad una singola unità esterna, anche con capacità diverse. Ciascuna delle unità interne può essere azionata singolarmente nell'ambito della stessa modalità.  |   | • | • | • | • |
|                     | VRV ad uso residenziale         | Possibilità di collegare fino a 9 unità interne (anche con capacità diverse e fino alla classe 71) ad una singola unità esterna. Ciascuna delle unità interne può essere azionata singolarmente nell'ambito della stessa modalità. |  |   |   |   |   |   |
|                     | Capacità garantita fino a -25°C | Daikin dispone di prodotti adatti a tutti i climi, anche a rigide condizioni invernali, grazie al campo di funzionamento fino a -25°C.   |  |   |   |   |   |   |

\*Nota: le celle in blu contengono dati provvisori

ISO 9001: Daikin Air Conditioning Italy S.p.A. ha ottenuto la certificazione LRQA per il Sistema di Gestione della Qualità in conformità allo standard ISO 9001:2008.

Il Sistema di Gestione della Qualità riguarda i processi di vendita e postvendita, la consulenza specialistica, L'assistenza postvendita e i corsi di formazione alla rete.

ISO 14001: Daikin Air Conditioning Italy S.p.A. ha ottenuto la certificazione LRQA per il Sistema di Gestione Ambientale in conformità allo standard ISO 14001:2004.

La certificazione ISO 14001 garantisce l'applicazione di un efficace Sistema di Gestione Ambientale da parte di Daikin Italy in grado di tutelare persone e ambiente dall'impatto potenziale prodotto dalle attività aziendali.

SA 8000: Daikin Air Conditioning Italy S.p.A. ha ottenuto la certificazione da Bureau Veritas secondo lo schema SA 8000:2008.

Tale norma garantisce il comportamento eticamente corretto da parte dell'azienda nei confronti dei lavoratori lungo tutta la filiera.

CE: garantisce che i prodotti Daikin siano conformi alle norme europee relative alla sicurezza del prodotto.

Daikin Europe N.V. ha aderito al Programma di Certificazione EUROVENT per climatizzatori (AC), gruppi refrigeratori d'acqua (LCP), unità trattamento aria (AHU) e ventilconvettori (FC); i dati dei modelli certificati sono indicati nell'elenco dei prodotti Eurovent: [www.eurovent-certification.com](http://www.eurovent-certification.com) oppure [www.certiflash.com](http://www.certiflash.com)

Il particolare ruolo di Daikin come costruttore di impianti di condizionamento, compressori e refrigeranti, ha coinvolto in prima persona l'azienda in questioni ambientali.

Da molti anni Daikin si propone come leader nella fornitura di prodotti che rispettano l'ambiente. Questa sfida implica la progettazione e lo sviluppo "a misura di ambiente" di una vasta gamma di prodotti e sistemi di gestione attenti al risparmio energetico e alle problematiche legate alla produzione di rifiuti.

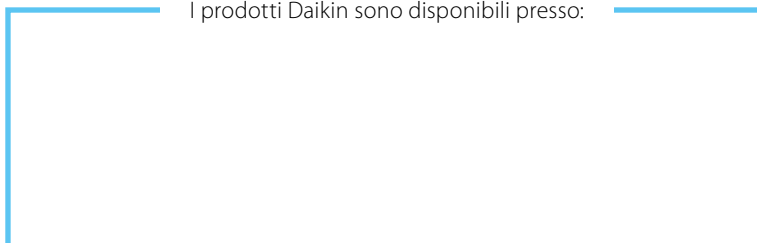

Daikin Italy aderisce al Consorzio Re.Media per adempiere agli obblighi operativi e finanziari previsti dal D.Lgs. 151/05, relativi al trasporto, reimpiego, trattamento, recupero, riciclaggio e smaltimento dei rifiuti RAEE domestici.

Daikin Italy ha stampato la presente pubblicazione su carta prodotta da legno proveniente da foreste gestite in maniera corretta e responsabile secondo rigorosi standard ambientali, sociali ed economici.

I prodotti Daikin sono disponibili presso:

Daikin Air Conditioning Italy S.p.A. non si assume responsabilità per eventuali errori o inesattezze nel contenuto di questo prospetto e si riserva il diritto di apportare ai suoi prodotti, in qualunque momento e senza preavviso, eventuali modifiche ritenute opportune per qualsiasi esigenza di carattere tecnico o commerciale.

I climatizzatori contengono gas fluorurati a effetto serra.
